The gameplay in Minecraft is great, but nothing can beat the feeling of being able to make a zombie run through a field with a machine gun and shoot your friends. There are no rules in Minecraft, which means that you can do whatever you want. Although it is tempting to download those mods that will let you kill your enemies, or add more weapons in the game, it is not recommended because it can be hard to tell which mods are safe to download. Plus, you could end up with some malware on your computer if you don't know what you are doing. It is much better if you choose mods that add something else to the game instead of changing how things work. In my opinion, one of the best mods to download would be N.P.C (non-playable characters) mods. The mod is basically a bunch of programs that you can add to your game, and they will make it much more interesting than it already is. There are plenty of N.P.C mods out there, but one I have found to be very interesting is the Steve mod. The Steve mod allows Minecraft characters (like the player) to run around on their own and move in any direction they want â€“ all you have to do is give them a path to

follow by making blocks for them to walk on.",
