"Rust" takes place in a post-apocalyptic world where climate change has reportedly caused most animals (including humans) to become extinct. A player begins their journey by choosing to build themselves a shelter or start mining and gather resources as soon as possible for crafting valuable items which can be sold for money. There are currently a total of five different servers available for players to choose to play on. Each of these server types vary in difficulty, with playable game modes including deathmatch and conquest mode."

The gameplay in Minecraft is great, but nothing can beat the feeling of being able to make a zombie run through a field with a machine gun and shoot your friends. There are no rules in Minecraft, which means that you can do whatever you want. Although it is tempting to download those mods that will let you kill your enemies, or add more weapons in the game, it is not recommended because it can be hard to tell which mods are safe to download. Plus, you could end up with some malware on your computer if you don't know what you are doing. It is much better if you choose mods that add something else to the game instead of changing how things work. In my opinion, one of the best mods to download would be N.P.C (non-playable characters) mods. The mod is basically a bunch of programs that you can add to your game, and they will make it much more interesting than it already is. There are plenty of N.P.C mods out there, but one I have found to be very interesting is the Steve mod. The Steve mod allows Minecraft characters (like the player) to run around on their own and move in any direction they want " all you have to do is give them a path to follow by making blocks for them to walk on."

When creating a custom modpack, there are many different things you can do to give your server an extra edge over other servers or creative mode servers. These mods can all be obtained with a simple download, and even if you don't want to create your own modpack for your server, they are all still available. Players can also use these mods on servers that aren't part of the official Minecraft community if you decide to share and give them access to them."

With the release of Minecraft Bedrock Edition, Mojang team also announced that they will support servers better than ever. That means that once you launch a server, no one can stop it unless you shut it down yourself. Before this update, if your Anti-Cheat software is not updated, or you don't have a firewall but still want to run a successful server, people can easily hack into your server and ruin everything. With the new updates coming soon to Bedrock Edition servers, this problem will be solved and everyone will be happy playing on their favorite servers.",

Multiplayer mode will help you to practice your skills and perfect them while you have a good time with friends on your server. In this mode, each player starts off in their own private world, where they are free to build whatever they like without any limitations. There are no rules and no laws, meaning that you can build whatever you like, but don't forget to choose the right location when building your house. When playing against other players, be careful not to cheat! You can use various cheats to get an advantage over other players though.",

If there is one mod that is very popular among all the others, it has to be Keep Craft Mod. This mod makes it so that people keep their objects with them as they try to escape from dungeons. This is a great way for taking back some of the items in dungeons when monsters do not want to give them up. The mod is easily configurable in case you don't want the damage that it can do to your game. It also allows for a lot of new materials in your game and some new recipes. This is one of the most popular mods out there because so many people want to be able to retrieve their items after they have spent a long time gathering them in dungeons or
